

ZEPPOS

Real-time employee management application.

Zeppos

- Zeppos by Starcom Systems is an advanced employee management application which brings the advantages of Starcom's hardware solutions to your cell-phones, smart watches and tablets.
- Zeppos extends Starcom Systems advanced management software, allowing you to manage all your assets and your team members under one platform.
- The application is easily downloaded into any iPhone and Android devices and allows you to communicate with your employees, know their whereabouts and receive constant transmissions and updates from them.
- You can now track and trace both your vehicle and your drivers from anywhere, at any time.
- Zeppos allows you to research and improve your team management and to adopt improved work protocols.
- An emergency button provides enhanced security and enable employees to contact you with the click of a button.
- Zeppos is a user friendly, cost-effective and reliable solution – which brings your business management into a new level.
