

**Starcom Plc**  
("Starcom" or the "Company")

**Long Term Extension Contract with Existing Client**

Starcom (AIM: STAR), which specialises in the development of wireless solutions for the remote tracking, monitoring and protection of a variety of [assets](#) and people, is pleased to announce that it has been awarded a long term extension of the contract with a major international organisation which was originally announced on 8 September 2015.

The first contract with the client followed a competitive tender and involved the supply of 100 units of the new Helios Hybrid unit. As a result of the client's satisfaction with the product, the Company has been awarded a contract for the supply and installation of a hybrid GPS satellite-GSM based vehicle fleet tracking system. The system will be a hybrid (a combination of GSM and GPS satellite-based communications systems) land mobile vehicle fleet tracking system that would comprise a central management console (or consoles) and is able to track up to a minimum of approximately 250 client units.

The agreement has a three year term commencing on 31 January 2016. In addition, and as usual, there will be recurring monthly fees for the web services offered to support each unit.

**Avi Hartmann, CEO of Starcom, commented,** "Yet again we have proved that on an international level, our Helios Hybrid, with its 'always connected' satellite tracking technology, is preferred over our competition's products. Our client runs a large fleet of vehicles and we hope that orders will follow within the three year period of the contract."
