t42 IoT Tracking Solutions plc
("t42" or the "Company")

**t42 Secures Commercial Order with DHL
for its IoT Shipping Container Tracking Solutions**

t42 IoT Tracking Solutions plc (AIM: TRAC) ("t42" or the "Company"), the real-time tracking, security and monitoring solutions provider for the global container and freight market, is pleased to announce a commercial order for its tracking solutions and services from DHL, the global leader in logistics.

Following a successful pilot programme that ran over multiple global destinations, DHL has confirmed an initial commercial order for t42 Tracking Lock units (previously known as Lokies) for use in Singapore. The Company expects the initial order for 32 units to be followed by further orders by DHL.

The pilot programme was a competitive process, with the competing solutions of several other companies tested simultaneously. DHL chose t42 as its preferred provider, stating that its technology had a significant advantage over t42's competitors in terms of its capabilities, big data analysis and reports received from the system and service levels. Furthermore, t42 has received a formal certificate of excellence from DHL in recognition of the quality of its solution.

Avi Hartmann, CEO of t42, commented:

"This is our first commercial order with global logistics leader DHL. Following a competitive and successful pilot programme, this order represents a vote of confidence and validation of our tracking solution and our strategy shift to the global shipping container market.

"The order reflects the progress being made with key customers globally, in line with our growth strategy for 2022, and we look forward to updating the market about further orders in due course."
