12.3.2012

Dear Mr. Hartmann,

As you already know, the Watchlock was selected to be the ASSA ABLOY candidate for the 2012 IFSEC Security Innovation Award. I am now pleased to inform you that it was selected by the Innovation Award Committee as one of the three final candidates in its category of Physical Security Products.

As you also know we are seizing the opportunity of this event for a worldwide launch of the Watchlock. The products will be also launched 5 days prior to the exhibition in Singapore, in a unique cooperation between Mul-T-Lock, Starcom, ASSA ABLOY Singapore and one of the largest cellular operators in Asia Pacific, SingTel Singapore.

We are all very excited about the launch of the Watchlock and are looking forward with hope for winning the IFSEC Innovation award, to be announced on the evening of May 14th.

Best of luck to the Watchlock, and best regards,

Yoav Tomer

VP Product Management
